2002 年，精益生产 的概念被引入中国。精益生产是一种旨在减少浪费、提高效率的生产方式。它强调在满足客户需求的前提下，以最少的资源消耗，实现高质量、低成本、短交货期的生产目标。精益生产的核心思想是“流动”和“拉动”，即通过优化生产流程，使物料和信息在生产过程中顺畅流动，并根据实际需求进行拉动生产。精益生产的主要原则包括：消除浪费、尊重人、持续改进、标准化和稳定性。精益生产的应用范围广泛，不仅限于制造业，还广泛应用于服务业、物流业和医疗行业。

Production Device

KRAUSS MAFFEI

Finehope has successively introduced many of the world's most advanced German KraussMaffei high-pressure injection machines since 2010.

Reaction Injection Molding (RIM) High Pressure Machine KRAUSS MAFFEI Made in Germany!

Self-invented fully automatic production line

Finehope has independently developed a number of fully automatic P-U injection production lines since 2010. These production lines reduce production costs and meet customer delivery requirements.

Welding Robots

Since 2016, Finehope has continued to purchase welding robots and automatic fixture turntables for welding metal parts. The independent processing of accessories saves the waiting time and procurement cost of outsourcing processing.

CNC Machine

Finehope has continued to purchase CNC equipment since 2016. CNC (Computer Numerically Controlled) machining is a manufacturing process in which pre-programmed computer software dictates the movement of factory tools and machinery. Using this type of machine versus manual machining can result in improved accuracy, increased production speeds, enhanced safety, increased efficiency and most importantly, help customers save costs and improve product quality.

Mould Release Agent Painting Robot

Since 2019, Finehope has purchased robots for spraying water-based release agents to improve the working environment, improve spraying quality and material utilization, and reduce labor costs.

3D printer

Finehope started to purchase 3D printers in 2015. 3D printing can realize rapid proofing of new product prototypes and templates for resin molds, and can also be used for faster and cheaper small batch production.
