公司拥有一流的生产设备和先进的技术，能够为客户提供高质量的产品和优质的服务。公司拥有完善的质量管理体系，确保产品质量的稳定性和可靠性。公司拥有专业的技术团队，能够为客户提供专业的技术支持和售后服务。公司拥有先进的生产设备，能够为客户提供高质量的产品。公司拥有先进的技术，能够为客户提供优质的服务。公司拥有完善的质量管理体系，确保产品质量的稳定性和可靠性。公司拥有专业的技术团队，能够为客户提供专业的技术支持和售后服务。公司拥有先进的生产设备，能够为客户提供高质量的产品。公司拥有先进的技术，能够为客户提供优质的服务。公司拥有完善的质量管理体系，确保产品质量的稳定性和可靠性。公司拥有专业的技术团队，能够为客户提供专业的技术支持和售后服务。公司拥有先进的生产设备，能够为客户提供高质量的产品。公司拥有先进的技术，能够为客户提供优质的服务。

Toyota Production System (TPS) is a manufacturing system that aims to achieve the highest quality, lowest cost, and shortest lead times. It is based on the principles of Just in Time (JIT) and Jidoka. JIT focuses on continuous flow, takt time, and a pull system. Jidoka focuses on built-in quality, error proofing, and separating human and machine work. These principles are supported by standardized work and stability.

The S.M.A.R.T. goal formula is a framework for setting effective goals. It consists of five criteria: Specific, Measurable, Attainable, Relevant, and Time-bound. Each criterion provides a clear guideline for how to define and achieve a goal.

## Production Device

### KRAUSS MAFFEI

Finehope has successively introduced many of the world's most advanced German KraussMaffei high-pressure injection machines since 2010.

Reaction Injection Molding (RIM)  
High Pressure Machine  
KRAUSS MAFFEI  
Made in Germany!

### Self-invented fully automatic production line

Finehope has independently developed a number of fully automatic P-U injection production lines since 2010. These production lines reduce production costs and meet customer delivery requirements.

### Welding Robots

Since 2016, Finehope has continued to purchase welding robots and automatic fixture turntables for welding metal parts. The independent processing of accessories saves the waiting time and procurement cost of outsourcing processing.

### CNC Machine

Finehope has continued to purchase CNC equipment since 2016. CNC (Computer Numerically Controlled) machining is a manufacturing process in which pre-programmed computer software dictates the movement of factory tools and machinery. Using this type of machine versus manual machining can result in improved accuracy, increased production speeds, enhanced safety, increased efficiency and most importantly, help customers save costs and improve product quality.

### Mould Release Agent Painting Robot

Since 2019, Finehope has purchased robots for spraying water-based release agents to improve the working environment, improve spraying quality and material utilization, and reduce labor costs.

### 3D printer

Finehope started to purchase 3D printers in 2015. 3D printing can realize rapid proofing of new product prototypes and templates for resin molds, and can also be used for faster and cheaper small batch production.

## Social Responsibility
