## Our Advantages

2002 年，日本製造業在國際市場上重新確立了領導地位。這主要歸功於其在精益生產（Lean Production）方面的卓越表現。精益生產是一種旨在消除浪費、提高效率的生產方法。它強調在正確的時間、以正確的數量、在正確的位置生產出正確的產品。精益生產的核心理念是「Just in Time」（JIT）和「Jidoka」（自働化）。JIT 確保物料在需要時才到廠，從而減少庫存和等待時間。Jidoka 則通過設備和人員的協同工作，確保產品質量，並在發現異常時立即停止生產。此外，精益生產還包括標準化工作、持續改進（Kaizen）和員工參與等要素。這些做法不僅提高了生產效率，還降低了成本，增強了企業的競爭力。

## KRAUSS MAFFEI

Finehope has successively introduced many of the world's most advanced German KraussMaffei high-pressure injection machines since 2010.

Reaction Injection Molding (RIM) High Pressure Machine KRAUSS MAFFEI Made in Germany!

## Self-invented fully automatic production line

Finehope has independently developed a number of fully automatic P-U injection production lines since 2010. These production lines reduce production costs and meet customer delivery requirements.

## Welding Robots

Since 2016, Finehope has continued to purchase welding robots and automatic fixture turntables for welding metal parts. The independent processing of accessories saves the waiting time and procurement cost of outsourcing processing.

## CNC Machine

Finehope has continued to purchase CNC equipment since 2016. CNC (Computer Numerically Controlled) machining is a manufacturing process in which pre-programmed computer software dictates the movement of factory tools and machinery. Using this type of machine versus manual machining can result in improved accuracy, increased production speeds, enhanced safety, increased efficiency and most importantly, help customers save costs and improve product quality.

## Mould Release Agent Painting Robot

Since 2019, Finehope has purchased robots for spraying water-based release agents to improve the working environment, improve spraying quality and material utilization, and reduce labor costs.

## 3D printer

Finehope started to purchase 3D printers in 2015. 3D printing can realize rapid proofing of new product prototypes and templates for resin molds, and can also be used for faster and cheaper small batch production.
