report****FREE****Mould****3D Design****Product Inspection
Standard Setting**

Free Product Inspection Standard Setting:
In addition to the usual quantification of product physical properties and appearance standards, we will add REACH, RoHS, FDA, CA-65, or CFC Free to the standards according to customer needs.

Free Mould Opening:
Large order quantity with mould cost free.

Free 3D Design:
Finehope help customer design the desired product or modify the design for free.

Free DFM/A Report:
Finehope will show details and solutions of manufacturability and assemblability through PPT to help customers reduce trouble.

PU 2002 Finehope PU Finehop 2007 Fortune 500

2003 ISO 9001 2007 Fortune 500

1. Toyota Production System (TPS) 係指 Toyota 公司所發展出之生產系統，其核心目標為「Highest Quality, Lowest Cost, Shortest Lead Times」。TPS 包含兩大支柱：Just in Time (JIT) 與 Jidoka。JIT 強調「Continuous Flow」、「Takt Time」及「Pull System」，旨在減少庫存並提高效率。Jidoka 則著重於「Built-in Quality」、「Error Proofing」及「Separate Human and Machine Work」，以確保品質並防止錯誤。這兩大支柱均建立在「Standardized Work」之基礎上，最終達到「Stability」之目標。

2. The S.M.A.R.T. goal formula 係指設定目標時應遵循之原則。其包含五個要素：Specific (明確)、Measurable (可衡量)、Attainable (可達成)、Relevant (相關) 及 Time-bound (有時限)。這些要素共同確保目標清晰、可追蹤且能激勵員工達成。

Production Device

KRAUSS MAFFEI

Finehope has successively introduced many of the world's most advanced German KraussMaffei high-pressure injection machines since 2010.

Reaction Injection Molding (RIM)
High Pressure Machine
KRAUSS MAFFEI
Made in Germany!

Self-invented fully automatic production line

Finehope has independently developed a number of fully automatic P-U injection production lines since 2010. These production lines reduce production costs and meet customer delivery requirements.

Welding Robots

Since 2016, Finehope has continued to purchase welding robots and automatic fixture turntables for welding metal parts. The independent processing of accessories saves the waiting time and procurement cost of outsourcing processing.

CNC Machine

Finehope has continued to purchase CNC equipment since 2016. CNC (Computer Numerically Controlled) machining is a manufacturing process in which pre-programmed computer software dictates the movement of factory tools and machinery. Using this type of machine versus manual machining can result in improved accuracy, increased production speeds, enhanced safety, increased efficiency and most importantly, help customers save costs and improve product quality.

Mould Release Agent Painting Robot

Since 2019, Finehope has purchased robots for spraying water-based release agents to improve the working environment, improve spraying quality and material utilization, and reduce labor costs.

3D printer

Finehope started to purchase 3D printers in 2015. 3D printing can realize rapid proofing of new product prototypes and templates for resin molds, and can also be used for faster and cheaper small batch production.
